

Aishwary Pandore

Cybersecurity Analyst

Mumbai, India

aishwary.pandore@somaiya.edu

[linkedin.com/aishwary-pandore](https://www.linkedin.com/aishwary-pandore)

Summary

Highly motivated engineering student pursuing a B Tech degree in Electronics and Telecommunication with strong foundational knowledge in network security, threat intelligence, risk management, and vulnerability analysis.

Actively practice web security by solving BurpSuite labs on PortSwigger Academy, TryhackMe labs and studying networking fundamentals through Cisco courses to enhance penetration testing and network security skills.

Passionate about security and eager to learn from experts in the field.

Experience

HARIDAS JIVRAJ & PARTNER CO. L.L.C, Oman — *Front End Developer*

1 AUGUST 2022 - 31 AUGUST 2022

1. Collaborated with the design team to create a user-friendly and visually appealing interface.
2. Developed and implemented responsive web design for optimal viewing on various devices.
3. Tested the website on different browsers to ensure everything worked correctly.
4. Used HTML, CSS, and JavaScript to add basic features and improve user experience.

Maharashtra Cyber Cell, Mumbai — *Cyber Security Analyst*

OCT 2024 - APRIL 2025

1. Assisted in cyber forensic investigations, analyzing digital evidence to support law enforcement in cybercrime cases.
2. Conducted vulnerability assessments and threat analysis, enhancing cybersecurity measures for various digital infrastructures.
3. Researched and applied cyber laws and criminal procedures, ensuring compliance and legal accuracy in cybercrime cases..

4. Provided technical support to internal users, including assistance with system access issues, secure configurations, and endpoint protection tools.
5. Responded to and escalated user-reported incidents related to suspicious emails, malware alerts, and unauthorized access.
6. Collaborated with IT teams to implement secure system configurations, patch updates, and antivirus monitoring.
7. Contributed to user awareness training sessions, educating staff on phishing, safe browsing practices, and password hygiene.

CyberSecureIndia, Remote Internship — *Cyber Security & Digital Forensic Intern*

APRIL 2025 - Present

Gained hands-on exposure to core cybersecurity and forensics tools and techniques.

1. Network Security: Reconnaissance, Nmap scanning, Burp Suite, Metasploit.
2. Web Security: Injections(SQLi/XSS), Broken Authentication/Access Control, CSRF, SSTI.
3. Mobile Pentesting: Android (Static & Dynamic Analysis).
4. System Exploitation: Linux & Windows Privilege Escalation.
5. Cloud Security: AWS Fundamentals, Defense Techniques.
6. Digital Forensics: Evidence collection, case study analysis, forensic investigation workflow.

Skills & tools

- Wireshark, Nmap, Metasploit, Burp Suite
- Proficient in Java and Python.
- Experience with MySQL and Linux.

Project

- **Design of 5.8 GHz Circularly Polarized Microstrip Patch Antenna for DRDO Defense Project — *Consultancy Project***

Successfully designed and simulated a circularly polarized microstrip patch antenna using ANSYS HFSS, in collaboration with a DRDO-aligned defense consultancy. This project specifically targeted the 5.8 GHz ISM band, aiming to optimize the antenna for space and defense communication systems. The

primary objectives were to achieve robust circular polarization, high efficiency, and stable radiation patterns that ensure secure and reliable communication, even in rugged and high-interference environments.

Certifications

- Google Professional Cyber Security Certificate
- Hands-On Penetration Testing with Metasploit by Infosys
- Cybersecurity Job Simulation by Forage

Education

Lokpuram Public School, Thane— 10th

Percentage : 85%

Pace Junior Science College, Thane — 12th

Percentage : 85.17%

KJ Somaiya Institute of Technology, Mumbai— *B.Tech EXTC*

CGPA : 9.05

KJ Somaiya Institute of Technology, Mumbai— *B.Tech Cybersecurity(hons)*
