Cybersecurity Analyst and recognized achiever in advanced OSINT. Recently completed a B.Tech in Electronics & Telecommunication with Honors in Cybersecurity. Gained extensive practical experience through a high-performance internship at Cyber Secured India (94% proficiency) and law enforcement support for the Maharashtra Cyber Cell. Proficient in digital forensics, vulnerability assessment (Nmap, Burp Suite), and network reconnaissance.

## Work Experience

---

### Cyber Secured India & .MKITOS

Remote

OSINT Analyst (Top Achiever – CTRL. ALT. ACT. Program)

09/2025 - 10/2025

- **DISTINCTION:** Awarded the exclusive "Certificate of Achievement," granted only to top performers, distinguishing this from standard course completion.
- Recognized for setting a "standard of excellence" and demonstrating advanced OSINT expertise throughout the 4-week intensive.
- Conducted ethical intelligence gathering and analysis, setting a standard of excellence within the cohort.

### Cyber Secured India

Remote

Cyber Security & Digital Forensic Intern

04/2025 - 08/2025

- **MERIT DISTINCTION:** Achieved a score of 94.44% in assessments, earning the exclusive "Certificate of Achievement" awarded only to top performers.
- **Network & Web Security:** Performed reconnaissance using Nmap, Burp Suite, and Metasploit; identified vulnerabilities such as SQL, XSS, and Broken Access Control.
- **Mobile & System Security:** Conducted Android static/dynamic analysis and performed privilege escalation on Linux & Windows systems.
- **Cloud Security:** AWS Fundamentals, Defense Techniques.
- **Digital Forensics:** Executed evidence collection and forensic investigation workflows for case study analysis.

### Maharashtra Cyber Cell

Mumbai

Cyber Security Analyst Intern

10/2024 - 04/2025

- **HONORS:** Awarded a Letter of Appreciation from the Deputy Inspector General (DIG) for outstanding contribution to cyber forensic investigations and law enforcement support.
- Assisted in cyber forensic investigations, analyzing digital evidence to support law enforcement in cybercrime cases.
- Conducted vulnerability assessments and threat analysis, enhancing cybersecurity measures for various digital infrastructures.
- Researched and applied cyber laws and criminal procedures, ensuring compliance and legal accuracy in cybercrime cases.
- Provided technical support to internal users, including assistance with system access issues, secure configurations, and endpoint protection tools.
- Collaborated with IT teams to implement secure system configurations, patch malware alerts, and unauthorized access.
- Contributed to user awareness training sessions, educating staff on phishing, safe browsing practices, and password hygiene.

### HARIDAS JIVRAJ & PARTNER CO. L.L.C, Oman

Remote

Front End Developer Intern

08/2022 - 09/2022

- Collaborated with the design team to create a user-friendly and visually appealing interface.
- Developed and implemented responsive web design for optimal viewing on various devices.
- Tested the website on different browsers to ensure everything worked correctly.
- Used HTML, CSS, and JavaScript to add basic features and improve user experience.

| <b>DEFENSE CONSULTANCY PROJECT: 5.8 GHz Circularly Polarized Antenna</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                    | 06/2025 |
| Successfully designed and fabricated a circularly polarized microstrip patch antenna using ANSYS HFSS, in collaboration with a DRDO-aligned defense consultancy. This project specifically targeted the 5.8 GHz ISM band, aiming to optimize the antenna for space and defense communication systems. The primary objectives were to achieve robust circular polarization, high efficiency, and stable radiation patterns that ensure secure and reliable communication, even in rugged and high-interference environments. |         |

## Skills

---

### Technical Skills:

OSINT (Open-Source Intelligence), Digital Forensics, Burp Suite, Metasploit, Nmap, Wireshark, Linux, Ansys HFSS, AutoCAD

### Soft Skills:

Adaptability, Creativity, Problem-solving, Project Management, Team Leadership

## Certifications
